

On-site Aviation Safety Support

Avisure provides Works Safety Officers and Aerodrome Reporting Officers with extensive knowledge and experience in airport operations, including the legal and safety requirements around airport construction projects. We promote a pragmatic approach that rigorously adheres to regulations and individual aerodrome procedures to ensure safe and efficient operations.

Ensuring a safe work environment for all

ARO and WSO Services

Avisure provides Works Safety Officers and Aerodrome Reporting Officers to complement ongoing risk mitigation strategies and ensure a safe working environment during construction and development works, and daily operations.

- Aerodrome serviceability inspections
- Communication of aerodrome conditional changes
- Reporting functions
- Gate control
- Issue and control of visitor passes
- OLS monitoring and control
- Wildlife patrols, monitoring and management
- Vehicle escorts

We are committed to working as an extension of your safety team to achieve the best results in the following areas:

- Completion of aerodrome serviceability inspections (including aerodrome lights and OLS).
- Communication of safety and security requirements to all relevant stakeholders.
- Relationship management of key stakeholders involved in airport safety, security and construction activity.
- Adherence to relevant safety and security requirements for works carried out in security restricted areas of all airports.
- Foreign Object Debris sweeping.

Avisure Works Safety Officers have:

- Current Australia-wide ASICs.
- Authority to drive airside at several airports in fully equipped and insured 4WD vehicles.
- Construction Safety Induction cards.
- Aerodrome Reporting Officer certificates (ARO).
- Aircraft Radio Operators Certificate of Proficiency (AROCp).
- Specialised wildlife hazard management training.
