

Wildlife Hazard Management Training

Years of hands on experience and research has contributed to the development of a training program specifically for personnel involved in wildlife strike management. From airport operators and safety regulators to airline staff, Avisure training workshops provide cutting-edge solutions essential to effective wildlife management.

Our trainers are experienced educators and specialists in the field of wildlife risk management at airports. We have delivered training workshops and programs to airports around the world including Australia, the Pacific, North America and the Middle East.

Learn about **Wildlife Hazard Management** from the world's best

We customize training programs and workshops

Areas of Focus

- Risk Assessment
- Bird Identification
- Managing Risks and Hazards
- Strike Management for Managers
- Writing Management Plans

Wildlife Hazard Management Training

Highly skilled and knowledgeable personnel are the key to a successful Wildlife Management Program. Managing wildlife hazards can be complex and requires not just aviation expertise but also an understanding of wildlife behaviour.

Our practical and theoretical training modules draw on years of experience from Australia and around the world. Our experienced trainers deliver world class programs to airports, airlines, regulators, aviation biologists and anyone who has an interest in wildlife hazard management.

With basic, refresher and advanced programs available, we can cater for all levels. We also specialise in customising programs and workshops for clients in order to meet their specific needs. Assessing competency is important, so we include assessments as part of our standard programs.

Basic Program Modules

1. Background
2. The International Perspective
3. The Local Context
4. Statistics
5. Strike Reporting
6. Monitoring
7. Bird Identification
8. Dispersal and Culling
